

## ABDULLAH WAQAR

Lahore, Pakistan | +92 326 8591728 | abdullahwaqar533@gmail.com

### PROFESSIONAL SUMMARY

Detail-oriented and quick-learning Computer Science student with hands-on experience in game development and Robotic Process Automation (RPA). Skilled in coding, UiPath bot development, and delivering creative, functional solutions under deadline. Seeking to leverage technical and analytical skills to contribute to a results-driven team while continuing to grow professionally.

### SKILLS

Programming Languages: C++, C#, Java, Python, Dart

Web Development: HTML, CSS, JavaScript

App & Software Development: Flutter, Android Studio, Firebase, Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Mobile App Development, Game Development

Tools & Technologies: RPA / UiPath Bot Development, Office Ally, Git & Version Control, Database Management (SQL, MongoDB), Visual Studio Code, Windsurf, Cursor, Devin AI

Core Competencies: Problem Solving, Fast Typing, Detail-Oriented, Time Management, Quick Learner

### PROFESSIONAL EXPERIENCE

#### Assistant RPA Executive — IPS Pakistan

2025 – 2026

- Develop and maintain automation bots using UiPath to streamline business processes.
- Work with Office Ally systems to support automated workflow execution.
- Collaborate with the RPA team to identify process improvement opportunities and reduce manual workload.

#### Gaming Coder — Huya Group

2023 – 2025

- Built a train simulation game developed for a client in China.
- Developed a railway station simulation game for a client in China.
- Wrote and debugged game logic code, ensuring smooth gameplay performance and functionality.

### PROJECTS

#### Voting System — Academic Project | C++, Python, MongoDB

- Designed and developed a voting system with secure voter registration and duplicate-vote prevention.

#### Parking Management System — Academic Project | C++, MongoDB

- Built a system to manage vehicle entry/exit, slot allocation, and real-time parking availability.

#### Bus Station Management System — Academic Project | C++, MongoDB

- Developed a system to manage bus schedules, routes, ticket booking, and passenger records.

#### WorkPilot — Web Application | JavaScript, HTML, CSS

Developed a productivity-focused web application for managing and organizing work-related tasks and workflows.

#### AI Code Reviewer — AI Project | Python, AI, Code Analysis

Built an AI-powered code review tool to analyze source code, identify potential issues, and provide improvement suggestions.

#### Watermark Remover — Personal Project | Python, Image Processing

Developed a tool to remove watermarks from images and streamline image cleanup workflows.

### EDUCATION

BS Computer Science (BSCS) — University of the Punjab (Punjab University)

In Progress

Intermediate — Government Islamia College, Railway Road, Lahore

2022 – 2024

### LANGUAGES

Urdu (Fluent) • English (Fluent)
